Summary

Data Analytics and Data Science enthusiast with hands-on experience developing AI-powered applications, enterprise ERP solutions, and inventory management systems. Skilled in Python, SQL, Tableau, Machine Learning, and data visualization with experience building scalable applications and transforming operational data into actionable insights. Passionate about solving real-world problems through analytics, automation, and predictive modeling.

Experience

NTPC Limited , Dadri – Vocational Trainee

Jul 2026 – Present

- Assisted in analyzing operational and maintenance data for process monitoring and performance evaluation.
- Worked with engineering teams to understand industrial workflows and data collection practices.
- Performed data organization, reporting, and documentation for operational insights.
- Gained exposure to industrial automation systems and data-driven decision making.
- Currently building an ERP system for Vocational Training/ Internship Candidates.

Projects

InOut+ Attendance ERP (Industrial Project)

Nov 2025 – Jun 2026

- Developed an Attendance ERP deployed across **Swarna Technical Textiles Pvt. Ltd., Nufab Technical Textiles Pvt. Ltd.,** and **Nufab Green Pvt. Ltd.** with face-recognition attendance, shift tracking, and salary computation.
- Designed PostgreSQL database architecture for attendance and workforce analytics across multiple factories.
- Automated attendance reports and operational dashboards to support management decision making.
- Implemented scalable backend services and role-based workflows for enterprise operations.
- Deployment:** Synology NAS Server

CattleEye – AI-Based Cattle Breed Classification System

- Built a full-stack AI application using React, Flask, TensorFlow, and MySQL.
- Collected, cleaned, and preprocessed image datasets for machine learning.
- Trained and evaluated an EfficientNetB0 model for cattle breed classification.
- Designed REST APIs for real-time image prediction and model inference.
- Developed complete frontend-backend integration for AI-powered classification.

Technical Skills

Languages: Python, SQL, Java

Data Science & ML: NumPy, Pandas, Scikit-learn, TensorFlow, Keras, Matplotlib

Analytics & Visualization: Tableau, Microsoft Excel, Data Visualization, Exploratory Data Analysis (EDA)

Backend & Frameworks: Flask, FastAPI, REST APIs

Databases: PostgreSQL, MySQL

Frontend: React, HTML, CSS

Developer Tools: Git, GitHub, Docker, Synology NAS, Jupyter Notebook, VS Code, Google Colab

Concepts: Data Cleaning, Data Modeling, Feature Engineering, Machine Learning, Role-Based Access Control (RBAC)

Education

B.Tech in Computer Science and Engineering (Current CGPA: 7.05)

Expected May 2027

Dr. A. P. J. Abdul Kalam Technical University, Lucknow

(College – ABES Institute of Technology)

10+2 (Non-Medical) – 82.8%

March 2023

Shri Guru Ram Rai Sr. Sec. Public School, Ludhiana, Punjab

10th (Secondary Education) – 80.4%

March 2021

BCM Arya Model Senior Secondary School, Ludhiana, Punjab

Certifications

- Oracle – Oracle AI Foundations Associate
- ABES Institute of Technology – Data Analysis using SQL and Tableau
- Infosys Springboard – Database Management System (Part 1 & 2)
- Infosys Springboard – Troubleshooting Python & Machine Learning

Achievements

- Top 10 Team – Hacknovate 7.0
- State Basketball Player
- Smart India Hackathon (SIH) Volunteer
